PROFESSIONAL EXPERIENCE

Cero Global Holdings | Data Analyst, NJ

Feb 2026 - Present

Fleet Telematics Analytics: Fuel Efficiency and Driver Behavior Analysis (May 2026 – Jul 2026)

- Built a reusable Python and Geotab API pipeline to process approximately **1.7M event-driven telemetry records** from 12 commercial vehicles across vehicle-specific 30-day Before and After periods, producing standardized datasets for comparative fleet analysis.
- Implemented data-quality and time-aware aggregation rules that removed duplicate and invalid records, excluded counter resets and stale intervals exceeding 5 minutes, and prevented irregular reporting frequency from biasing vehicle KPIs.
- Engineered fuel-efficiency, RPM, idling, and driving-stability KPIs and designed a class-normalized **4-component FEI-Lite framework**, producing validated performance scores for **100% of vehicles (12/12)** despite inconsistent signal availability.
- Developed **3 interactive Tableau dashboards** that quantified a **-0.68% fleet-level FEI-Lite change** and identified 4 improving and 8 declining vehicles, supporting executive reporting and targeted vehicle-level performance review.

CACE Fuel Consumption Diagnostics (Jul 2026 – Aug 2026)

- Developed an actual-versus-expected fuel consumption diagnostic pipeline using **425 validated telemetry windows**, reducing untouched final-test **MAE by 2.64%** versus the physics baseline.
- Applied chronological and unseen-vehicle validation with SHAP analysis, identifying vehicle speed as the leading model-correction feature at **54.4%** and prioritizing high-deviation vehicles for further review.

STEM Science Center | Research Assistant, NJ

Aug 2024 - Jul 2025

- Mentored a **finalist team** in a New York City science fair, guiding Python-based EDA, feature engineering, visualization, and model evaluation for an energy-demand forecasting project that produced a **25+ page technical report** with city-level policy recommendations.

EDUCATION

The City College of New York (CUNY), New York, NY

Aug 2025 - May 2027 (Expected)

- Master of Science in Mathematics
- **M.S. Relevant Coursework:** Statistics, Probability, Data Analysis, Machine Learning, Advanced Calculus

The City College of New York (CUNY), New York, NY

Jan 2018 - May 2022

- Bachelor of Engineering in Computer Engineering
- **B.E. Relevant Coursework:** Software Engineering, Data Structures & Algorithms, MATLAB

PROJECTS

Vehicle CAN Analytics Pipeline

Feb 2026 - Mar 2026

- Developed an end-to-end cloud-based telemetry pipeline that processed and validated **1.9M+ MF4 CAN records**, transforming raw vehicle signals into query-ready datasets using Python, AWS S3, Athena, and SQL.
- Engineered session-level telemetry KPIs and developed **5 interactive Tableau dashboards** to analyze driving versus idling behavior, anomaly events, and vehicle performance across multiple test sessions.

Every AIdu

Jul 2025 - Mar 2026

- Built and launched a cross-platform AI-powered education application for iOS and Android, reaching **50+ beta users across 10+ countries**.
- Implemented incremental caching and selective Firestore updates, reducing leaderboard load time by **60%** and infrastructure costs by **70%** while maintaining a **0% crash rate during beta**.

SKILLS

Data & Analytics: SQL (PostgreSQL, MySQL, AWS Athena), Python (Pandas, NumPy), Excel, Tableau, AWS S3, ETL/Data Pipelines, Data Cleaning & Validation, KPI Development, Geotab API

Programming & Machine Learning: JavaScript, React Native, scikit-learn, Random Forest, XGBoost, SHAP, Model Evaluation

Tools & Languages: Git/GitHub, Firebase, Docker; Korean (Native), English (Professional)
